

**PROFESSIONAL GROWTH and STAFF DEVELOPMENT**

The Fall Mountain School Board recognizes that a rapidly changing society demands continuous retraining and in-service education of teachers and other personnel as an essential ingredient to quality education, and therefore, requires that:

- All certified personnel participate in Staff Development as a condition of employment;
- A program of in-service training be established to provide an opportunity for the continuous professional and technical growth of staff;
- The administrative staff employing administrative and management techniques consistent with modern management development will provide leadership, and will assist staff members to make a maximum contribution to the School District's effort to provide a quality educational program for all students.
